

Call for Demos

<http://www.fg2015.org/participate/demos/>

Demo submissions

FG2015 will host demo sessions to give researchers the opportunity to showcase live demonstrations of their contributions. The demonstrations are intended to display, in an interactive setting, new algorithms, methods, technologies and system prototypes. The demonstrations are not limited to papers being presented at the conference, although demonstration of work published at FG2015 or its workshops is encouraged. The primary requirement is that the topic of the demo falls within the broad context of face and gesture recognition.

Prospective demo participants should fill out a demo application form ([.doc](#), [.pdf](#)) and submit it along with one page description and the video, showing the actual demo. The application form should list the requirements of a demonstration (space, power, internet connection, etc.) All submitted demos will be reviewed, and decisions will be based on the degree of quality and appropriateness for FG2015.

The demos will be included in the conference proceedings as one page abstracts, and will compete for the best demo award, sponsored by FG2015.

At least one presenter for each demo must be registered for the conference. Demonstrations from academia, government, and industry are welcome. However, the displays of commercial products can not be accepted as demos, but only as part of the [exhibition program](#).

Important dates

- Application deadline: December 15, 2014
- Acceptance notification: January 6, 2015
- Camera-ready demo description (one page): January 27, 2015

For further information about demos please contact FG2015 Demo & Exhibition chairs: Janez Pers (janez.pers@fe.uni-lj.si) or Irene Kotsia (irene.kotsia@eecs.qmul.ac.uk)
