## **Ljubljana City Walking Tour**

The most distinctive feature of Slovenia's largest city is its medieval hilltop Castle which offers a breathtaking panorama of the city together with excellent views of the old town and surrounding area. On the tour you will see most of the attractions in the city centre including the Triple Bridge, Town Hall, Preseren square, Cathedral, open market, Parliament building, Opera house, Dragon bridge...

The old city centre has a unique architectural appearance, particularly due to its mixture of Baroque and Art Nouveau architecture with masterful creations by the 20th century architect Jože Plecnik.
